EDITORIAL

We hope to make this newsletter a regular occurrance but this can only happen with your help. If you have any ideas, information, rumors, suggestions, etc. please let me know. The continuance of this newsletter depends on you.

SUNDAY WORKSHOP

The long awaited Sunday workshop is to be held on the thirteenth (13) March at the Hooper Educational Centre, Pre-School Centre, which is in the grounds of Wavell Heights State Primary School. The centre is in Kuran Street which is off Gympie Road. We have the centre booked from 12:30 to 5 p.m. Bring yourself, your family, your computer, (if you own one), and a picnic lunch. If you wish, bring a gas B.B.Q. to cook a hot lunch.

CBM-64

Thinking of buying a CBM-64 ? Please let us know as perhaps we may be able to do a bulk purchase. By making a bulk purchase, we should be able to save you some money and get something for the club into the bargain.

POST OFFICE BOX

Please note the new address above. The postal address is now as above. This shift was for two reasons: the box at Stones Corner was geographically difficult for any of the executive to clear and was physically too small to handle the volume of mail which we receive. Any correspondence should now be addressed as above.

../2

SOFTWARE

If we all make a list of all the non-club software we own we can save eachother unnecessary hassles finding helpful and/or useful programs. There is nothing more frustrating than spending $200 on a program which refuses to run properly. Those of you who are hiding all those useful programs under your beds, with your money, please at least give us a listing of the titles and a brief comment on what the programs do.

STATIC DISPLAY HINT

If you wish to use your CBM 4016/4032 as an electronic display but don't want people to fiddle with your program do a poke 1003,0 to disable the keyboard. You can only get out of it easily with a reset.

VIC-20

Any hints for the VIC-20 users would be greatfully appreciated.

John Egan
(Secretary/Treasurer)
